For now

I work as a manager.

He took a 3-month internship in Neonline.

IT-Academy

December 2023 - May 2024

- I am developing a course project. Online store of electronic cigarettes and liquids.
- The store itself consists of 3 interconnected projects.
- Business logic and main entities in the VapeShop_API project. frameworks that the project uses: EFCore, Newtonsoft.Json, Serilog, LINQ. Also contains Middleware for error handling. GIT - https://github.com/KillZedr/VP_API.git
- FluentValidation will be added to the project.
- VapeShop.Identity contains: MVC pattern and IdentityServer4 framework.
- GIT - <https://github.com/KillZedr/VapeShop.Identity.git>
- The visual part is under development. NextJS
- GIT - <https://github.com/KillZedr/VapeShopNet.git>
- Developed microservices for payments (Stripe, PayPal) (<https://github.com/killzedr/beckmarketplace/tree/develop>)
- (<https://github.com/KillZedr/PaymentDemoVersion/tree/dev>)
- Real time chats (SignalR, Redis, Docker)
- (<https://github.com/KillZedr/RealTymeChat.git>)
